About Me

My name is Akar, I am 24 years old and married. I am a Backend Developer with a strong interest in building reliable, scalable systems. I enjoy working with APIs, backend architectures, databases, and problem-solving in computer engineering–related fields. I am motivated to continuously learn and improve my technical skills while contributing to efficient and well-structured software solutions.

Soft Skills

- Management Skills
- Creativity
- Digital Marketing
- Negotiation
- Critical Thinking
- Leadership

Education

Bachelor of Computer Engineering
Komar University Of Science and Technology 2019 - 2024

Bachelor of Computer Engineering, Komar University of Science and Technology (2019–2024). During my studies, I developed strong interests in API development, backend systems, databases, and core computer engineering topics such as operating systems, digital logic, compilers, and other engineering-related fields.

Experience

Avos
Back-end Development 2024

I worked as a Backend Developer on the WaterPipe application, using Spring Boot for backend development and React.js for the frontend. I designed and implemented RESTful APIs, managed data using PostgreSQL, and deployed the application on a Railway server. My role focused on building secure, scalable, and efficient backend services.

Juaa.io
Back-end Development 2025

I worked as a Backend Developer on a car mechanic web application, where my main responsibility was designing and storing application data. I developed backend services and APIs to manage vehicle and mechanic information, ensuring reliable data handling and efficient database operations for the platform.

Language

Kurdish - Fluent

Arabic - Beginner

English - Intermediate

Skills

Backend Development

- Strong understanding of backend concepts
- Spring Boot (RESTful APIs, database integration, server-side development)
- Microservices architecture
- Version control using Git

Frontend Development

- Vue.js
- JavaScript
- HTML, CSS
- Bootstrap

Database Management

- Experience with relational and non-relational databases
- MySQL
- Oracle SQL
- PostgreSQL
- Firebase

Computer Engineering

- Digital Logic Design
- Arduino
- Computer Organization and Architecture (COA)
